

Task : Configure your data and Foundry IQ

3. Then, in the Knowledge section, expand the Add dropdown, and select Connect to Foundry IQ.

Problem : this will not let you create AI search and storage account from Foundry

The screenshot shows the Microsoft Foundry interface in a Google Chrome browser. The main content area is titled "Foundry IQ" and "Ground your agent in enterprise knowledge". It prompts the user to "Connect your agent to Foundry IQ to combine multiple data sources behind an agentic retrieval engine." and "Connect to an AI Search resource to get started". There are dropdown menus for "Azure AI Search resource" (with "Select a resource" as the current selection) and "Auth Type" (with "Project Managed Identity" as the current selection). A "Connect" button is visible. Below these, there is a link "Not sure? Create new resource".

The right-hand panel shows a list of instructions for setting up Foundry IQ:

- 2. Select **Save** to save your current agent configuration.
- 3. Then, in the **Knowledge** section, expand the **Add** dropdown, and select **Connect to Foundry IQ**.
- 4. In the Foundry IQ setup window, select **Connect to an AI Search resource** and then **Create new resource** which should open up the Azure portal in a new tab.
- 5. Create a search resource with the following settings:
 - Subscription: Your Azure subscription
 - Resource group: Use the same resource group as your project
 - Service name: `ai-search61834983`

At the bottom of the right-hand panel, there are "Previous" and "End" buttons, and a progress bar indicating "2 Hr 25 Min Remaining".

Solution : We will these services from portal.azure.com **AI search and storage account**

Important : Take location : SwedenCentral

The screenshot shows the Microsoft Azure portal interface. The main content area displays the 'Microsoft Foundry | AI Search' page for the 'LODS-Prod-MCA' subscription. It indicates that no search services are currently displayed and provides a 'Create' button. The sidebar on the right contains a list of instructions for integrating an AI agent with Foundry IQ. The instructions include steps for creating a search resource and uploading sample data. A URL is provided for downloading sample data: <https://github.com/MicrosoftLearning/ai-agents/raw/main/Labfiles/04-integrate-agent-with-foundry-iq/data/cotoso->. The bottom of the screen shows the Windows taskbar with the time 7:13 AM on 5/15/2026.

Instructions Resources

the Add dropdown, and select **Connect to Foundry IQ**.

4. In the Foundry IQ setup window, select **Connect to an AI Search resource** and then **Create new resource** which should open up the Azure portal in a new tab.

5. Create a **search** resource with the following settings:

- Subscription: Your Azure subscription
- Resource group: Use the same resource group as your project
- Service name: `ai-search61834983`
- Location: The same location as your project
- Pricing tier: Free if available, otherwise choose Basic

Now you'll upload sample product information documents to connect to with Foundry IQ.

1. Download the sample product information files by opening a new browser tab and navigating to <https://github.com/MicrosoftLearning/ai-agents/raw/main/Labfiles/04-integrate-agent-with-foundry-iq/data/cotoso->
